DIRECTORS' REPORT TO THE MEMBERS

The Directors have the honor to present 35th Annual Report of your Company together with Audited Financial Statements and Auditors' Report thereon for the year ended June 30, 2023. Figures for the previous year ended June 30, 2022 are included for comparison.

Company Performance

The year under review has been economically turbulent and volatile domestically as well as globally. Inflation, supply disruptions, liquidity shortages, slumping export and local demand characterized the year. Despite the challenging economic situation, your company has managed to remain profitable. The after tax profit for the year stood at Rs. 419,735,090 or 3.43% of sales compared to Rs. 1,231,300,289 or 11.32% of sales during same period of last year (SPLY). Earning per share (EPS) for the year is Rs. 38.33 compared to Rs. 112.45 during SPLY.

Sales revenue increased by 12.42% over the SPLY and stood at Rs. 12,224,217,632 compared to Rs. 10,873,425,199 during SPLY. The increase in sales revenue is mainly due to increase in yarn prices. Cost of sales rose from 80.24% of sales during SPLY to 91.48% of sales during the period under review. The rise in cost of sales was primarily due to increase in raw material costs, energy costs and labour costs, which led to lower gross profit. As a result, the company's gross profit margin decreased from 19.76% of sales during SPLY to 8.52% of sales during the period under review. Higher sales value impact was dampened by surging cost which resulted in lower profitability.

Operating expenses decreased from 3.79% of sales during SPLY to 3.16% of sales during the period under review. The decrease is mainly due to lower provisions for WPPF and WWF because of lower profitability in comparison to SPLY. The company has been able to generate stable cash flows and made timely discharge of its operating liabilities. During the year, interest rates rose to historically high levels. High interest rates have raised bank financing costs to unbearable levels. State Bank of Pakistan (SBP) is not allowing LTFF financing for purchase of machinery. Consequently, all the imported machinery retired in last one year or so is exposed to market based interest rates. All these factors in combination have resulted in rise in finance cost to 1.55% of sales during the period as compared to 1.50% of sales during SPLY.

According to the figures issued by the Pakistan Cotton Ginners Association, for the crop year 2023-24, Kapas, (seed cotton) arrivals up to September 15, 2023, at the Ginneries totaled 3.934 million bales compared to 2.187 million bales for the year 2022-23 showing increase in arrival of 79.91%. Further, because of increased sowing area and better climatic conditions, we hope by the grace of Allah, the crop size in this year will rise to around 10 million bales as compared to 5.4 million bales during last year. This is a significant improvement in crop size. We hope this improvement in crop size will reduce reliance on imported cotton as well as ease the burden on the foreign exchange of the country.

Capital Assets Investment

In line with strategic plans for enhancing spinning productivity, quality and efficiency, your Company has installed 16,800 spindles during the year under review. After the current BMR/Expansion plan, the total installed capacity now stands at 79,200 spindles. During the year under review, your company has invested Rs. 1.758 billion (2022: Rs. 1.817 billion) in BMR/Expansion.

Future Outlook

The company has been operating in a persistently challenging economic environment. Profit margins on its products have been squeezed. Demand for yarn is unsatisfactory. Our customers in the finished goods export sector report that international textile retailers are grappling with excessive inventory levels, which have hindered their ability to place new orders. The implementation of monetary tightening policies by central banks in major economies has raised concerns about the potential for a global recession. This unfavorable backdrop has led to a noticeable deceleration in global textile demand. In spite of this unfavorable environment, we expect the government to further increase wages, electricity, fuel and financial costs leading to increases in costs of spares, administration, transport and the overall conversion cost.

The challenge facing the company is to remain profitable inspite of inflation and reduced demand. Your management is aware of the current situation and is consistently evaluating its approach to meet customer demands, enhance productivity through innovation, efficiency and effective cost management initiatives. The recent Standby Agreement (SBA) with the IMF for USD 3 billion has provided breathing space to the deteriorating economy. The IMF deal is likely to restore market confidence and hopefully will lead to a revival of economic activities within the Country. The expectation of a 10 million plus bales crop of cotton is another positive element.

It is hoped that the Government will bring in business friendly policies such as uninterrupted energy supplies in cost effective manner, refund of outstanding sales tax and income tax, controlling the inflation rate and reducing the financial costs and release of LTFF facility against the machinery against which LCs has already been retired. Government policies should encourage the completion of the value chain in the textile sector so that the country can export finished products.

ممبران کے لئے ڈائریکٹرز کی رپورٹ

مجلسِ نغمہ 30 جون 2023ء کو اختتام سال کے لئے کمپنی کی 35 ویں سالانہ رپورٹ مع نظر ثانی شدہ مالیاتی حسابات اور اس پر محاسب کی رپورٹ پیش کرتے ہوئے خوشی محسوس کر رہی ہے۔ 30 جون 2022ء کو ختم ہونے والے گزشتہ سال کے اعداد و شمار بھی موازنہ کے لئے شامل کئے گئے ہیں۔

کمپنی کی کارکردگی

زیر جائزہ سال ملکی اور عالمی سطح پر معاشی طور پر کشیدہ اور اتار چڑھاؤ کا شکار رہا۔ موبگائی، سپلائی میں خلل، لیکویڈیٹی کی قلت، برآمدات اور مقامی طلب کی گراؤ سال کی خصوصیت رہی ہے۔ کمپنی نے مشکل معاشی حالات کے باوجود منافع کمایا ہے۔ کمپنی نے گزشتہ سال کی اسی مدت کے دوران 1,231,300,289 روپے یا فروخت کا 11.32 فیصد کے مقابلے 419,735,090 روپے یا فروخت کا 3.43 فیصد کا بعد از ٹیکس منافع درج کیا ہے۔ فی شیئر آمدنی (EPS) (SPLY) کی 112.45 روپے کے مقابلے میں اس سال 38.33 روپے ہے۔

فروخت آمدن میں گزشتہ سال کی اسی مدت کے دوران سے 12.42 فیصد کا اضافہ ہوا اور گزشتہ سال کی اسی مدت کے دوران 10,873,425,199 روپے کے مقابلے 12,224,217,632 روپے رہی۔ فروخت آمدن میں اضافہ بنیادی طور پر یارن کی قیمتوں میں اضافہ کی وجہ سے ہوا۔ گزشتہ سال کی اسی مدت کے دوران فروخت کی لاگت فروخت کی 80.24 فیصد سے بڑھ کر زیر جائزہ سال کے دوران فروخت کی 91.48 فیصد تک ہوئی۔ فروخت کی لاگت میں اضافے کی بنیادی وجہ خام مال کی قیمتوں، توانائی کی قیمتوں اور لیبر کی قیمتوں میں اضافہ ہے۔ جس نے مجموعی منافع کو کم کر دیا۔ جس کے نتیجے میں، گزشتہ سال کی اسی مدت کے دوران کمپنی کا مجموعی منافع مارجن (GP) فروخت کے 19.76 فیصد سے کم ہو کر زیر جائزہ سال کے دوران فروخت کا 8.52 فیصد ہو گیا۔ بڑھتی ہوئی لاگت سے زیادہ فروخت قیمت کا اثر زائل ہو گیا جس کے نتیجے میں منافع کم ہوا۔

آپریٹنگ اخراجات گزشتہ سال کی اسی مدت کے دوران فروخت کے 3.79 فیصد سے کم ہو کر زیر جائزہ مدت کے دوران فروخت کے 3.16 فیصد ہو گئے۔ یہ کمی بنیادی طور پر WPPF اور WWF کی کم پروڈن کی وجہ سے ہوئی کیونکہ منافع کم ہے۔ کمپنی مستحکم نقد بہاؤ پیدا کرنے میں کامیاب رہی ہے اور اس نے اپنی آپریٹنگ اور مالی ذمہ داریوں کو بروقت ادا کیا ہے۔ سال کے دوران، شرح سود تاریخی بلند ترین سطح پر پہنچ گئی۔ زیادہ شرح سود نے بینک کی مالیاتی لاگت کو ناقابل برداشت سطح تک بڑھا دیا ہے۔ اسٹیٹ بینک آف پاکستان (SBP) مشینری کی خریداری کے لیے LTFF فنانسنگ کی اجازت نہیں دے رہا ہے۔ نتیجتاً، گزشتہ ایک سال یا اس سے زائد عرصے میں ریٹائر ہونے والی تمام درآمدہ مشینری کو مارکیٹ بیڈ شرح سود کا سامنا ہے۔ ان تمام عوامل کے امتزاج کے نتیجے میں مالیاتی لاگت گزشتہ سال کی اسی مدت کے دوران فروخت کے 1.50 فیصد کے مقابلے میں اس مدت کے دوران فروخت کے 1.55 فیصد تک زیادہ ہو گئی ہے۔

پاکستان کاٹن جزا ایسوسی ایشن کی طرف سے فصل سال 2023-24 کے لئے جاری کردہ اعداد و شمار کے مطابق 15 ستمبر 2023 تک جزیر میں کپاس، (بیج کپاس) کی پہنچ سال 2022-23 کی کل 2.187 ملین گانٹھوں کے مقابلے میں 3.934 ملین گانٹھیں ہوئی جو کہ 79.91 فیصد کا اضافہ ظاہر کر رہی ہے۔ مزید برآں، بوائی کے رقبہ میں اضافے اور بہتر موسمی حالات کی وجہ سے، ہم اللہ کے فضل سے امید کرتے ہیں کہ گزشتہ سال 5.4 ملین گانٹھوں کے مقابلے میں اس سال فصل کا حجم بڑھ کر تقریباً 10 ملین گانٹھوں تک پہنچ جائے گا۔ یہ فصل کے سائز میں نمایاں بہتری ہے۔ ہمیں امید ہے کہ فصل کے سائز میں اس بہتری سے درآمدی کپاس پر انحصار کم اور ملک کے زر مبادلہ پر بوجھ بھی کم ہوگا۔

طویل مدتی اثاثوں کی سرمایہ کاری

سپینگ کی پیداوار، کوالٹی اور صلاحیت کو بہتر بنانے کے لئے سٹرٹیجک منصوبوں کے مطابق آپ کی کمپنی نے زیر جائزہ سال کے دوران 16,800 سپینڈلز نصب کر لئے ہیں۔ موجودہ BMR / توسیع کے منصوبے کے مکمل طور پر نافذ ہونے کے بعد، نصب شدہ کل صلاحیت تقریباً 79,200 سپینڈلز ہوگی ہے۔ زیر جائزہ سال کے دوران، آپ کی کمپنی نے BMR / توسیع میں 1.758 بلین روپے (2022): 1.817 بلین روپے) کی سرمایہ کاری کی ہے۔

مستقبل کے امکانات

کمپنی مسلسل مشکل معاشی ماحول میں کام کر رہی ہے۔ اس کی مصنوعات پر منافع کا مارجن کم ہو گیا ہے۔ یارن کی طلب غیر تسلی بخش ہے۔ تیار سامان کے برآمدی شعبہ میں ہمارے صارفین بیان کرتے ہیں کہ

بین الاقوامی ٹیکسٹائل ریٹیلرز انونیٹری کی ضرورت سے زیادہ سطح سے دوچار ہیں، جس کی وجہ سے ان کی نئے آرڈر دینے کی صلاحیت میں کمی ہے۔ بڑی معیشتوں میں مرکزی بینکوں کی طرف سے مالیاتی سخت پالیسیوں کے نفاذ نے عالمی کساد بازاری کے امکانات کے خدشات کو جنم دیا ہے۔ اس غیر موزوں پس منظر کی وجہ سے ٹیکسٹائل کی عالمی طلب میں نمایاں کمی واقع ہو گئی ہے۔ اس ناسازگار ماحول کے باوجود، ہم توقع کرتے ہیں کہ حکومت اجرتوں، بجلی، ایندھن اور مالیاتی اخراجات میں مزید اضافہ کرے گی جس کے نتیجے میں اسپنرز، انتظامیہ، ٹرانسپورٹ اور مجموعی طور پر تادلوں کی لاگت میں اضافہ ہو جائے گا۔

زیادہ افراط زر اور کم طلب کمپنی کے منافع بخش رہنے کیلئے اہم چیلنج ہیں۔ آپ کی انتظامیہ موجودہ صورتحال سے آگاہ اور صارفین کی طلب کو پورا کرنے، اخراج، کارکردگی اور موثر لاگت انتظامی اقدامات کے ذریعے پیداواری صلاحیت کو بڑھانے کے لیے اپنے نقطہ نظر کا مسلسل جائزہ لے رہی ہے۔ آئی ایم ایف کے ساتھ 3 بلین امریکی ڈالر کے حالیہ اسٹینڈ بائی ایگریمنٹ (SBA) نے کشیدہ معیشت کو کچھ سکون فراہم کیا ہے۔ آئی ایم ایف معاہدہ سے مارکیٹ کا اعتماد بحال ہونے کا امکان ہے اور امید کرتے ہیں کہ اس سے ملک کے اندر معاشی سرگرمیوں کی بحالی ہوگی۔ کپاس کی 10 ملین سے زائد گانٹھوں کی فصل کی توقع بھی مثبت عنصر ہے۔

یہ امید کی جاتی ہے کہ حکومت کاروبار میں موثر لاگت بلا تعلق توانائی کی فراہمی، بقایا سیکلر ٹیکس اور انکم ٹیکس کی واپسی جیسی دوستانہ پالیسیاں لائے گی تاکہ افراط زر کی شرح کو کنٹرول اور مالی اخراجات کو کم اور مشینری جس کے مقابل ایل سیز پیبلہ ہی ریٹائر ہو چکی ہیں کے لئے LTFE سہولت کا اجراء کیا جاسکے۔ حکومتی پالیسیاں ٹیکسٹائل شعبہ میں ویلیو چین کی مکمل حوصلہ افزاء ہونی چاہئیں تاکہ ملک تیار مصنوعات برآمد کر سکے۔

منافع منقسمہ

بورڈ آف ڈائریکٹرز نے 30 جون 2023ء کو ختم ہونے والے سال کے لئے حتمی نقد منافع منقسمہ بمشتر 60 فیصد یعنی 61 روپے فی عام شیئر کی منظوری دی ہے۔ منافع منقسمہ کی رقم 65,700,00 روپے ہے۔

Judgment has also been applied by management in determining the Net Realizable Value ['NRV'] of stock in trade.

The estimates and judgments applied by management are influenced by the amount of direct costs incurred historically, expectations of repeat orders to utilize the stock in trade, sales contract in hand and historically realized sales prices.

To address the valuation of stock in trade, we assessed historical costs recorded in the stock in trade valuation; testing on a sample basis with purchase invoices. We tested the reasonability of assumptions applied by the management in allocating direct labour and direct overhead costs to stock in trade.

We also assessed management's determination of the net realizable value of stock in trade by performing tests on the sales prices secured by the Company for similar or comparable items of stock in trade.

Key audit matter

The significance of the balance coupled with the judgment involved has resulted in the valuation of stock in trade being identified as a key audit matter.

The disclosures in relation to stock in trade are included in note 20 to the annexed financial statements.

How our audit addressed the matter

2. Revenue recognition

Refer to notes 5.15 and 25 to the financial statements.

The amount of revenue is the most significant class of transaction on the statement of profit or loss. Net revenue has increased by 12 percent in comparison with the previous year. Revenue is recognized when control of the underlying products has been transferred to the customer. We identified revenue recognition as a key audit matter since it is a key performance measure for the Company and gives rise to the risk associated with the judgement in determining the transfer of control of products as well as creates an incentive for fraudulently overstating revenue by recognizing revenue before transfer of control.

Our audit procedures in respect of recognition of revenue, amongst others, included the following:

- Assessing the appropriateness of the Company's revenue recognition accounting policies by comparing with applicable accounting standards;
- Obtaining an understanding of and testing the design and operating effectiveness of controls design to ensure that revenue is recognized in the appropriate accounting period;
- Comparing, on a sample basis, specific revenue transactions recorded before and after the reporting date with underlying documentation to assess whether revenue has been recognized in the appropriate accounting period;
- Critically assessing manual journals posted to revenue to identify unusual or irregular items; and
- Testing, on a sample basis, invoices and inspecting credit notes issued subsequent to year end for accuracy of revenue.

3. Tax contingencies

As disclosed in note 32 to the annexed financial statements, various tax matters are pending adjudication at various levels with the taxation authorities and other legal forums. Such contingencies require the management to make judgments and estimates in relation to the interpretation of tax laws and regulations and the recognition and measurement of any provisions that may be required against such contingencies. Due to inherent uncertainties and the time period such matters may take to resolve, the management's judgments and estimates in relation to such contingencies may be complex and can significantly impact the financial statements. For such reasons we have considered tax contingencies as a key audit matter.

Our key audit procedures in this area included, amongst others, a review of the correspondence of the Company with the relevant tax authorities and tax advisors including judgments or orders passed by the competent authorities.

We also obtained and reviewed confirmations from the Company's external tax advisor for their views on the status of each case and an overall opinion on the open tax position of the Company.

We involved internal tax experts to assess and review the management's conclusions on contingent tax matters and evaluated whether adequate disclosures have been made in the annexed financial statements.

Information other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of user taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the board of directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the board of directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Based on our audit, we further report that in our opinion:

- a) proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);
- b) the statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes thereon have been drawn up in conformity with the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;
- c) investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business; and
- d) zakat deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980), was deducted by the Company and deposited in the Central Zakat Fund established under section 7 of that ordinance.

The engagement partner on the audit resulting in this independent auditor's report is **ALI RAZA JAFFERY**.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2023

1 LEGAL STATUS AND OPERATIONS

Ellicot Spinning Mills Limited [the Company] was incorporated in Pakistan as a Public Limited Company under the repealed Companies Ordinance, 1984 (now Companies Act, 2017) and is listed on Pakistan Stock Exchange Limited. The Company is a spinning unit engaged in the manufacture and sale of yarn. The registered office of the Company is situated at Nagina House, 91-B-1, M.M. Alam Road, Gulberg III, Lahore. The manufacturing facility is located at 6.3 K.M, Manga Mandi, Raiwind Road Mouza Rossa, Tehsil and District Kasur in the Province of Punjab.

2 BASIS OF PREPARATION

2.1 Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards applicable in Pakistan comprise of:

- International Financial Reporting Standards [IFRS] issued by the International Accounting Standards Board [IASB] as notified under the Companies Act, 2017;
- Islamic Financial Accounting Standards [IFAS] issued by Institute of Chartered Accountants of Pakistan as notified under the Companies Act, 2017; and
- Provisions of and directives issued under the Companies Act, 2017.

Where provisions of and directives issued under the Companies Act, 2017 differ from the IFRS and IFAS, the provisions of and directives issued under the Companies Act, 2017 have been followed.

2.2 Basis of measurement

These financial statements have been prepared on the historical cost basis except for the following items, which are measured on an alternative basis as at the reporting date.

Items	Measurement basis
Financial liabilities	Amortized cost
Financial assets	Fair value/amortized cost
Employee retirement benefits	Present value

2.3 Critical accounting judgements and key sources of estimation uncertainty

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions and judgments are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the result of which forms the basis of making judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Subsequently, actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

2.3.1 Critical accounting judgements

Judgments made by management in the application of accounting and reporting standards that have significant effect on the financial statements and estimates with a risk of material adjustment in subsequent years are as follows:

(a) Business model assessment (see note 40.1)

The Company classifies its financial assets on the basis of the Company's business model for managing the financial assets and the contractual cash flow characteristics of the financial asset. The Company determines the business model at a level that reflects how financial assets are managed to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed. The Company monitors financial assets measured at amortized cost or fair value that are derecognized prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. No such changes were required during the year.

(b) Significant increase in credit risk (see note 41.1.1)

As explained in note 41.1.1, expected credit losses ['ECL'] are measured, based on the Company's risk grading framework, as an allowance equal to 12-month/lifetime ECL for 'performing' assets, or lifetime ECL for assets categorized as 'doubtful' or 'in default'. An asset is categorized as 'doubtful' when its credit risk has increased significantly since initial recognition. IFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased the Company takes into account qualitative and quantitative reasonable and supportable forward-looking information.

2.3.2 Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are as follows:

(a) Calculation of impairment allowance for expected credit losses on financial assets (see note 41.1.3)

The Company recognizes a loss allowance for expected credit losses on financial assets carried at amortized cost on date of initial recognition. The amount of expected credit losses is updated on each reporting date to reflect the changes in credit risk since initial recognition of the respective financial asset. Estimating expected credit losses and changes there in requires taking into account qualitative and quantitative forward looking information. When measuring expected credit losses on financial assets the Company uses reasonable and supportable forward looking information as well as historical data to calculate the difference between the contractual cash flows due and those that the Company would expect to receive, taking into account cash flows from collateral and integral credit enhancements, if any. Probability of default constitutes a key input in measuring expected credit losses. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions. If the ECL rates on financial assets carried at amortized cost were higher (lower) by 10%, the loss allowance on those assets would have been higher (lower) by Rs. 115.007 million (30-Jun-22: Rs. 112.29 million). Further information on the Company's credit risk management practices and credit quality and impairment of financial assets is referred to in note 41.1.3.

(b) Present value of defined benefit obligation (see note 10)

The determination of the Company's defined benefit obligation depends on certain assumptions, which include selection of the discount rate, average rate of increase in salaries and mortality rates. The discount rate is set by reference to market yields at the end of the reporting period on government bonds as there is no deep market for high quality corporate bonds in Pakistan. Average rate of increase in salary are based on market expectations, inflation and historical trends. Mortality rates are based upon SLIC(2001-05) mortality table. These assumptions are considered to be a key source of estimation uncertainty as relatively small changes in the assumptions used may have a significant effect on the Company's financial statements within the next year.

Present value of the Company's defined benefit obligation has been determined by an independent actuary, Nauman Associates, and is stated in the statement of financial position at Rs. 171.603 million (30-Jun-22: Rs. 143.398 million). Further information on the carrying amounts of the Company's defined benefit obligation and the sensitivity of those amounts to changes in assumptions is referred to in note 10.

(c) Taxation provisions (see note 33)

The Company takes into account the current income tax law and decisions taken by appellate and other relevant legal forums while estimating its provisions for current tax and tax contingencies. The provision for current tax is estimated at Rs. 152.054 million (30-Jun-22: Rs. 327.337 million). The management believes that the provision for current tax made in the financial statements is sufficient to discharge related tax liability.

Provision for deferred tax of Rs. 0.27 million (30-Jun-22: Rs. 70.532 million) has been estimated after taking into account historical and future turnover and profit trends and their taxability under the current tax law.

Further information on the taxation provisions is referred to in note 33.

2.4 Functional currency

These financial statements have been prepared in Pak Rupees which is the Company's functional currency. The amounts reported in these financial statements have been rounded to the nearest Rupees unless specified otherwise.

2.5 Date of authorization for issue

These financial statements were authorized for issue on September 25, 2023 by the Board of Directors of the Company.

3 NEW AND REVISED STANDARDS, INTERPRETATIONS AND AMENDMENTS EFFECTIVE DURING THE YEAR.

The following new and revised standards, interpretations and amendments are effective in the current year but are either not relevant to the Company or their application does not have any material impact on the financial statements of the Company other than presentation and disclosures, except as stated otherwise.

3.1 Reference to the Conceptual Framework (Amendments to IFRS 3 - Business Combinations)

The amendments update an outdated reference to the Conceptual Framework in IFRS 3 without significantly changing the requirements in the standard.

3.2 Property, Plant and Equipment - Proceeds before Intended Use (Amendments to IAS 16 - Property, Plant and Equipment)

The amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the cost of producing those items, in profit or loss.

3.3 Onerous Contracts - Cost of Fulfilling a Contract (Amendments to IAS 37 - Impairment of Assets)

The amendments specify that the 'cost of fulfilling' a contract comprises the 'costs that relate directly to the contract'. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract).

3.4 Annual Improvements to IFRS Standards 2018–2020

The annual improvements have made amendments to the following standards:

- **IFRS 1 - First Time Adoption of International Financial Reporting Standards** - The amendment permits a subsidiary that applies paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by its parent, based on the parent's date of transition to IFRSs.
- **IFRS 9 - Financial Instruments** - The amendment clarifies which fees an entity includes when it applies the '10 per cent' test in paragraph B3.3.6 of IFRS 9 in assessing whether to derecognise a financial liability. An entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf.
- **IFRS 16 - Leases** - The amendment to Illustrative Example 13 accompanying IFRS 16 removes from the example the illustration of the reimbursement of leasehold improvements by the lessor in order to resolve any potential confusion regarding the treatment of lease incentives that might arise because of how lease incentives are illustrated in that example.
- **IAS 41 - Agriculture** - The amendment removes the requirement in paragraph 22 of IAS 41 for entities to exclude taxation cash flows when measuring the fair value of a biological asset using a present value technique.

Other than afore mentioned standards, interpretations and amendments, IASB has also issued the following standards which have not been notified by the Securities and Exchange Commission of Pakistan [‘SECP’]:

IFRS 1 - First Time Adoption of International Financial Reporting Standards
IFRS 17 - Insurance contracts

The Company intends to adopt these new and revised standards, interpretations and amendments on their effective dates, subject to, where required, notification by Securities and Exchange Commission of Pakistan under section 225 of the Companies Act, 2017 regarding their adoption. The management anticipates that the adoption of the above standards, amendments and interpretations in future periods, will not have a material impact on the Company’s financial statements other than in presentation/disclosures.

5 SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

5.1 Property, plant and equipment

Property, plant and equipment assets held for use in the production or supply of goods or services or for administrative purposes, are stated in the statement of financial position at their cost less accumulated depreciation and accumulated impairment losses, except for freehold land, which is not depreciated.

Assets in the course of construction for production, supply or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognized impairment loss. Cost includes the cost of material, labour and appropriate overheads directly relating to the construction, erection and installation of the asset and, for qualifying assets, borrowing costs capitalized in accordance with the Company’s accounting policy. Depreciation of these assets, determined on the same basis as other assets of the same class, commences when the assets are ready for their intended use.

Depreciation is recognized in profit or loss, using rates specified in note 19.1, so as to write off the cost of assets (other than freehold land and assets under construction) over their useful lives, using the reducing balance method. Depreciation commences from the month in which the item is ready for intended use and is discontinued from the month in which the asset is disposed or classified as held for disposal.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

A property, plant and equipment asset is derecognized upon disposal or when no future economic benefits are expected to arise from its continued use. The gain or loss arising on the disposal or retirement of such assets is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

5.2 Intangible assets

Intangible assets with finite useful lives that are acquired separately or in a business combination are carried at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized in profit or loss, using amortization methods specified in note 19.3, over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately or in a business combination are carried at cost less accumulated impairment losses.

5.3 Stores and spares

These are generally held for internal use and are valued at cost. Cost is determined on the basis of moving average except for items in transit, which are valued at invoice price plus related cost incurred up to the reporting date. For items which are considered obsolete, the carrying amount is written down to nil. Spare parts held exclusively for capitalization are classified as property, plant and equipment.

5.4 Stock in trade

These are valued at lower of cost and net realizable value, with the exception of stock of waste which is valued at net realizable value. Cost is determined using the following basis:

Category	Basis of determination of cost
Raw material	Moving average cost
Work in process	Average manufacturing cost
Finished goods	Average manufacturing cost
Stock in transit	Invoice price plus related cost incurred up to the reporting date

Average manufacturing cost in relation to work in process and finished goods consists of direct material, labour and an appropriate proportion of manufacturing overheads.

Net realizable value signifies the estimated selling price in the ordinary course of business less estimated costs of completion and estimated costs necessary to make the sale.

5.5 Employee benefits

5.5.1 Short-term employee benefits

The Company recognizes the undiscounted amount of short term employee benefits to be paid in exchange for services rendered by employees as a liability after deducting amount already paid and as an expense in profit or loss unless it is included in the cost of inventories or property, plant and equipment as permitted or required by the accounting and reporting standards as applicable in Pakistan. If the amount paid exceeds the undiscounted amount of benefits, the excess is recognized as an asset to the extent that the prepayment would lead to a reduction in future payments or cash refund.

5.5.2 Post-employment benefits

The Company operates an unfunded gratuity scheme (defined benefit plan) for all its employees who have completed the minimum qualifying service period. Liability is adjusted on each reporting date to cover the obligation and the adjustment is charged to profit or loss with the exception of rereasurements which are recognized in other comprehensive income. The amount recognized on statement of financial position represents the present value of defined benefit obligation.

5.6 Financial instruments

5.6.1 Recognition

A financial instrument is recognized when the Company becomes a party to the contractual provisions of the instrument.

5.6.2 Classification

The Company classifies its financial assets on the basis of the Company's business model for managing the financial assets and the contractual cash flow characteristics of the financial asset. Financial liabilities are classified in accordance with the substance of contractual provisions. The Company determines the classification of its financial instruments at initial recognition as follows:

(a) Financial assets at amortized cost

These are financial assets held within a business model whose objective is to hold financial assets in order to collect contractual cashflows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(b) Financial assets at fair value through other comprehensive income ['fair value through OCI']

These are:

- (i) financial assets held within a business model whose objective is achieved by both collecting contractual cashflows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding; and
- (ii) investments in equity instruments, that are not held for trading nor contingent consideration recognized by the Company as acquirer in a business combination, for which the Company makes an irrevocable election at initial recognition to present changes in fair value on subsequent measurement in other comprehensive income.

(c) Financial assets at fair value through profit or loss

These are financial assets which have not been classified as 'financial assets at amortized cost' or as 'financial assets at fair value through other comprehensive income', are mandatorily measured at fair value through profit or loss or for which the Company makes an irrevocable election at initial recognition to designate as 'financial asset at fair value through profit or loss' if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

(d) Financial liabilities at amortized cost

These are financial liabilities which are not derivatives, financial guarantee contracts, commitments to provide loans at below-market interest rate, contingent consideration payable to an acquirer in a business combination or financial liabilities that arise when transfer of a financial asset does not qualify for derecognition.

(e) Financial liabilities at fair value through profit or loss

These are financial liabilities which have not been classified as 'financial liabilities at amortized cost' or for which the Company makes an irrevocable election at initial recognition to designate as 'financial liabilities at fair value through profit or loss' if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

5.6.3 Measurement

The particular measurement methods adopted are disclosed in individual policy statements associated with each financial instrument.

5.6.4 Derecognition

A financial asset is derecognized when the Company's contractual rights to the cash flows from the financial assets expire or when the Company transfers the financial asset to another party without retaining control of substantially all risks and rewards of the financial asset. A financial liability is derecognized when the Company's obligations specified in the contract expire or a discharged or cancelled.

5.6.5 Off-setting

A financial asset and financial liability is offset and the net amount reported in the statement of financial position if the Company has legally enforceable right to set-off the recognized amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

5.6.6 Regular way purchases or sales of financial assets

Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place. Regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

5.7 Ordinary share capital

Ordinary share capital is recognized as equity. Transaction costs directly attributable to the issue of ordinary shares are recognized as deduction from equity.

5.8 Loans and borrowings

Loans and borrowings are classified as 'financial liabilities at amortized cost'. On initial recognition, these are measured at cost, being fair value at the date the liability is incurred, less attributable transaction costs. Subsequent to initial recognition, these are measured at amortized cost with any difference between cost and value at maturity recognized in the profit or loss over the period of the borrowings on an effective interest basis.

5.9 Investments in mutual funds

Investments in mutual fund units are classified as 'financial assets at fair value through profit or loss [FVTPL]' unless the Company makes an irrevocable election at initial recognition, for a particular investment, to present subsequent changes in fair value in other comprehensive income in which case these are classified as 'financial assets at fair value through other comprehensive income [FVTOCI]'. On initial recognition, these are measured at fair value as on the date of acquisition. Subsequent to initial recognition, these are measured at fair value. Changes in fair value are recognized in profit or loss except where the Company has made an irrevocable election at initial recognition to present these changes in other comprehensive income. Cumulative gains and losses from changes in fair value recognized in other comprehensive income are transferred to retained earnings on derecognition. Dividend income is recognized in profit or loss when right to receive payment is established.

5.10 Investments in listed equity securities

Investments in listed equity securities are classified as 'financial assets at fair value through other comprehensive income'. On initial recognition, these are measured at fair value on the date of acquisition. Subsequent to initial recognition, these are measured at fair value. Changes in fair value are recognized in other comprehensive income. Cumulative gains and losses from changes in fair value recognized in other comprehensive income are transferred to retained earnings on derecognition. Dividend income is recognized in profit or loss when right to receive payment is established.

5.11 Short-term leases

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of twelve months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases are recognized as expense on a straight-line basis over the lease term.

5.12 Trade and other payables

5.12.1 Financial liabilities

These are classified as 'financial liabilities at amortized cost'. On initial recognition, these are measured at fair value at the date the liability is incurred, less attributable transaction costs. Subsequent to initial recognition, these are measured at amortized cost using the effective interest method, with interest recognized in profit or loss.

5.12.2 Non-financial liabilities

These, both on initial recognition and subsequently, are measured at cost.

5.13 Provisions and contingencies

Provisions are recognized when the Company has a legal and constructive obligation as a result of past events and it is probable that outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation. The amount recognized as provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risk and uncertainties surrounding the obligation. Where a provision is measured using cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. Where outflow of resources embodying economic benefits is not probable, or where a reliable estimate of the amount of obligation cannot be made, a contingent liability is disclosed, unless the possibility of outflow is remote.

5.14 Trade and other receivables

5.14.1 Financial assets

These are classified as 'financial assets at amortized cost'. On initial recognition, these are measured at fair value at the date of transaction, plus attributable transaction costs, except for trade receivables that do not have a significant financing component, which are measured at undiscounted invoice price. Subsequent to initial recognition, these are measured at amortized cost using the effective interest method, with interest recognized in profit or loss.

5.14.2 Non-financial assets

These, both on initial recognition and subsequently, are measured at cost.

5.15 Contracts with Customers

5.15.1 Revenue

Revenue is measured based on the consideration specified in a contract with a customer. The Company recognizes revenue from a contract with customer when the Company satisfies an obligation specified in that contract. The following table provides information about the nature and timing of the satisfaction of performance obligations in contracts with customers, including significant payment terms, and the related revenue recognition policies.

<u>Product/service</u>	<u>Nature and timing of satisfaction of performance obligations, including significant payment terms</u>	<u>Revenue recognition policies</u>
Yarn, Raw cotton, Polyester, Waste	Performance obligations are satisfied when goods are dispatched to customers. Invoices are generated at that point in time and are usually payable within a period ranging from 30 days to 120 days. There are no customer loyalty programs or warranty provisions. However, some contracts allow for return of goods if those do not meet the requirements or specifications provided in the contract.	Revenue is recognized at a point in time when the goods are dispatched to customers.

5.15.2 Contract assets

Contract assets represent work performed upto the reporting date which has not been invoiced to customers because the related performance obligations remain partially unsatisfied as at the reporting date.

5.15.3 Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration from the customer. A contract liability is recognized at earlier of when the payment is made or the payment is due if a customer pays consideration before the Company transfers goods or services to the customer.

5.16 Comprehensive income

Comprehensive income is the change in equity resulting from transactions and other events, other than changes resulting from transactions with shareholders in their capacity as shareholders. Total comprehensive income comprises all components of profit or loss and other comprehensive income ['OCI']. OCI comprises items of income and expense, including reclassification adjustments, that are not recognized in profit or loss as required or permitted by accounting and reporting standards as applicable in Pakistan, and is presented in 'statement of comprehensive income'.

5.17 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying asset is deducted from the borrowing costs eligible for capitalization. All other borrowing costs are recognized in profit or loss as incurred.

5.18 Government grants

Government grants are recognized in profit or loss on a systematic basis over the periods in which the Company recognizes as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Company should purchase, construct or otherwise acquire non-current assets (including property, plant and equipment) are recognized as deferred income in the statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Company with no future related costs are recognized in profit or loss in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates. The amount of grant is recognized as deferred income in the statement of financial position and transferred to profit or loss on a systematic and rational basis over the tenure of loan.

5.19 Income tax

Income tax expense comprises current tax and deferred tax. Income tax expense is recognized in profit or loss except to the extent that it relates to items recognized directly in other comprehensive income, in which case it is recognized in other comprehensive income.

5.19.1 Current taxation

Current tax is the amount of tax payable on taxable income for the year and any adjustment to the tax payable in respect of previous years. Provision for current tax is based on current rates of taxation in Pakistan after taking into account tax credits, rebates and exemptions available, if any. The amount of unpaid income tax in respect of the current or prior periods is recognized as a liability. Any excess paid over what is due in respect of the current or prior periods is recognized as an asset.

5.19.2 Deferred taxation

Deferred tax is accounted for using the 'balance sheet approach' providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for tax purposes. In this regard, the effects on deferred taxation of the portion of income that is subject to final tax regime is also considered in accordance with the treatment prescribed by The Institute of Chartered Accountants of Pakistan. Deferred tax is measured at rates that are expected to be applied to the temporary differences when they reverse, based on laws that have been enacted or substantively enacted by the reporting date. A deferred tax liability is recognized for all taxable temporary differences. A deferred tax asset is recognized for deductible temporary differences to the extent that future taxable profits will be available against which temporary differences can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

5.20 Earnings per share ['EPS']

Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

Diluted EPS is calculated by adjusting basic EPS by the weighted average number of ordinary shares that would be issued on conversion of all dilutive potential ordinary shares into ordinary shares and post-tax effect of changes in profit or loss attributable to ordinary shareholders of the Company that would result from conversion of all dilutive potential ordinary shares into ordinary shares.

5.21 Cash and cash equivalents

Cash and cash equivalents for the purpose of cash flow statement comprise cash in hand and cash at banks. Interest income on cash and cash equivalents is recognized using effective interest method.

5.22 Segment reporting

Segment reporting is based on the operating segments that are reported in the manner consistent with internal reporting of the Company. An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company's other components. An operating segment's operating results are reviewed regularly by the Chief Executive Officer to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available. The Company is a single operating segment based on internal reporting to the Chief Executive Officer of the Company.

5.23 Foreign currency transactions and balances

Transactions in foreign currency are translated to the functional currency of the Company using exchange rate prevailing at the date of transaction. Monetary assets and liabilities denominated in foreign currency are translated to the functional currency at exchange rate prevailing at the reporting date. Non-monetary assets and liabilities denominated in foreign currency that are measured at fair value are translated to the functional currency at exchange rate prevailing at the date the fair value is determined. Non-monetary assets and liabilities denominated in foreign currency that are measured at historical cost are translated to functional currency at exchange rate prevailing at the date of initial recognition. Any gain or loss arising on translation of foreign currency transactions and balances is recognized in profit or loss.

5.24 Impairment

5.24.1 Financial assets

The Company recognizes a loss allowance for expected credit losses on financial assets carried at amortized cost on date of initial recognition. The amount of expected credit losses is updated on each reporting date to reflect the changes in credit risk since initial recognition of the respective financial asset.

Impairment is recognized at an amount equal to lifetime expected credit losses for financial assets for which credit risk has increased significantly since initial recognition. For financial assets for which credit risk is low, impairment is recognized at an amount equal to twelve months' expected credit losses, with the exception of trade receivables, for which the Company recognizes lifetime expected credit losses estimated using internal credit risk grading based on the Company's historical credit loss experience, adjusted for factors that are specific to debtors, general economic conditions, and an assessment for both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

All impairment losses are recognized in profit or loss. An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognized. An impairment loss is reversed only to the extent that the financial asset's carrying amount after the reversal does not exceed the carrying amount that would have been determined, net of amortization, if no impairment loss had been recognized.

The Company writes off a financial asset when there is information indicating that the counter-party is in severe financial condition and there is no realistic prospect of recovery. Any recoveries made post write-off are recognized in profit or loss.

5.24.2 Non-financial assets

The carrying amount of the Company's non-financial assets, other than inventories and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. The recoverable amount of an asset or cash generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present values using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or cash generating unit.

An impairment loss is recognized if the carrying amount of the asset or its cash generating unit exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of cash generating units are allocated to reduce the carrying amounts of the assets in a unit on a pro rata basis. Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used in determining the recoverable amount. An impairment loss is reversed only to that extent that the asset's carrying amount after the reversal does not exceed the carrying amount that would have been determined, net of depreciation and amortization, if no impairment loss had been recognized.

5.25 Dividend distribution to ordinary shareholders

Dividend to ordinary shareholders is recognized as a deduction from retained earnings in statement of changes in equity and as a liability, to the extent it is unclaimed/unpaid, in the Company's financial statements in the year in which the dividends are approved by the Company's shareholders.

5.26 Fair value measurements

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

A number of the Company's accounting policies and disclosures require the measurement of fair values.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price - i.e. the fair value of the consideration given or received. If the Company determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

When one is available, the Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Company measures assets and long positions at a bid price and liabilities and short positions at an ask price.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- *Level 1:* quoted prices (unadjusted) in active markets for identical assets or liabilities.
- *Level 2:* inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- *Level 3:* inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Administrative expenses	29.1	28,261,318	12,828,101

Experience adjustments		4,234,655	1,171,389
		5,395,322	1,244,126

10.5 Principal actuarial assumptions

Present value of defined benefit obligation has been determined using projected unit credit method. The liability as at the reporting date is based on actuarial valuation carried out by independent actuaries, Nauman Associates. The principal assumptions used in determining present value of defined benefit obligation are:

	30-Jun-23	30-Jun-22
Discount rate	16.25%	13.25%
Expected rate of increase in salary	15.75%	12.75%

10.6 Average duration of the defined benefit obligation

The average duration of the defined benefit obligation is 6 years.

10.7 Expected charge to profit or loss for the next financial year

The expected charge to profit or loss for the year ending 30 June 2024 amounts to Rs. 61.498 million.

10.8 Sensitivity analysis

An analysis of sensitivity for discount rate and expected rate of increase in salary used to determine the present value of defined benefit obligation as at the reporting date showing how the defined benefit obligation would have been affected by changes in relevant actuarial assumption that were reasonably possible at that date is as follows:

	30-Jun-23		30-Jun-22	
	Change in actuarial assumption	Defined benefit obligation <i>Rupees</i>	Change in actuarial assumption	Defined benefit obligation <i>Rupees</i>
Discount rate	+ 1%	161,578,927	+ 0.5%	135,653,959
	- 1%	182,986,442	- 0.5%	151,949,965
Expected rate of increase in salary	+ 1%	183,285,480	+ 0.5%	151,949,965
	- 1%	161,130,779	- 0.5%	135,588,319

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated. Furthermore, in presenting the above sensitivity analysis, the present value of defined benefit obligation as at the reporting date has been calculated using projected unit credit method, which is the same as that applied in calculating the defined benefit obligation to be recognized in these financial statements.

10.9 Risk factors

The defined benefit plan exposes the Company to the following actuarial risks:

Interest risk: The discount rate used in determination of present value of defined benefit obligation has been determined by reference to market yield at the reporting date on government bonds since there is no deep market in long term private sector bonds in Pakistan. An increase in market yield resulting in a higher discount rate will decrease the defined benefit liability.

Longevity risk: The present value of defined benefit obligation is calculated by reference to the best estimate of the expected remaining working lives of employees. An increase in the expected remaining working lives will increase the defined benefit obligation. However, the increase is not expected to be material.

Salary risk: The present value of defined benefit obligation is calculated by reference to future salaries of employees. An increase in salary of employees will increase the defined benefit obligation.

11.2 Deferred tax arising from timing differences pertaining to income from business is provided for only that portion of timing differences that represent income taxable under normal provisions of the Income Tax Ordinance, 2001 [the 'Ordinance'] as revenue from export sales of the Company is subject to taxation under the final tax regime, while the remaining portion of revenue attracts assessment under normal provisions of the Ordinance. These differences are calculated at that proportion of total timing differences that the local sales, other than the indirect exports taxable under section 154 (3) of the Ordinance, bear to the total sales revenue based on historical and future trends. Deferred tax has been calculated at 31% (30-Jun-22: 33%) of the timing differences so determined based on tax rates notified by the Government of Pakistan for future tax years.

Deferred tax arising from timing differences pertaining to income from investment in listed equity securities taxable as a separate block under the provisions of the Ordinance, has been calculated at 14.5% (30-Jun-22: 16.5%) of the timing differences based on tax rates notified by the Government of Pakistan for future tax years for such income.

Deferred tax arising from timing differences pertaining to income from investment in mutual funds taxable as a separate block under the provisions of the Ordinance, has been calculated, at 12% (30-Jun-22: 14%) for stock funds and at 28% (30-Jun-22: 29%) for other funds, of the timing differences based on tax rates notified by the Government of Pakistan for future tax years for such income.

12 DEFERRED GRANT

The State Bank of Pakistan ['SBP'] through IH&SMEFD circular no. 1 of 2020 dated 17 March 2020, introduced a 'Temporary Economic Refinance Facility' ['TERF']. Further SBP through IH&SMEFD circular no. 6 of 2020 dated 10 April 2020, introduced a 'Refinance Scheme for Payment of Wages and Salaries to Workers and Employees of Business Concern' ['the Refinance Scheme']. The purpose of these schemes was to provide relief to dampen the effects of COVID - 19 by providing loans at interest rates that are below normal lending rates.

The Company obtained financing of Rs. 174.567 million under the Refinance Scheme (see note 9.16) and of Rs. 1,598.132 million under TERF (see notes 9.5, 9.8, 9.12 and 9.15). The benefit of below market interest rates, measured as the difference between the fair value of loan on the date of disbursement and its face value on that date has been recognised as deferred grant.

These represent investments in listed equity securities and mutual funds which have been designated as 'financial assets at fair value through other comprehensive income'. These investments are not held for trading. Instead, they are held for strategic purposes for an indefinite period. Accordingly, the Company has elected to designate these investments as at fair value through other comprehensive income as the management believes that recognizing short-term fluctuations in these investments' fair value in profit or loss would not be consistent with the Company's strategy of holding these investments and realizing their performance potential in the long run. 33.3 The Company's case was selected for audit by the Additional Commissioner Inland Revenue ['ACIR'] for tax year 2003 in terms of section 177 of the Ordinance in May 2004. On conclusion of audit proceedings, ACIR through order passed under section 122(1) of the Ordinance in September 2008, raised a tax demand of Rs. 8,458,874. The Company filed an appeal before Commissioner Inland Revenue (Appeals) ['CIR (A)'] against this order in November 2008 and the CIR (A), through order dated 13 June 2009, dismissed certain disallowances / additions made by the ACIR and upheld some of them against which the Company filed an appeal before Appellate Tribunal Inland Revenue ['ATIR'] in August 2009. Moreover, ACIR also went into cross appeal against the CIR (A)'s order before the ATIR. The ATIR vide order dated 17 March 2022 has ruled in favour of the Company on both appeals.

33.4 In respect of tax year 2006, the ACIR finalized proceedings under section 122(5A) of the Ordinance through order dated 30 June 2012, wherein a demand of Rs. 4.855 million was raised against the Company on the grounds that minimum tax under section 113 of the Ordinance is to be levied in addition to tax under final tax regime. The Company appealed against the order before CIR(A) in September 2012 and applied for rectification on account of correction of charge of 'Workers' Welfare Fund' and 'brought forward losses' under section 221 of the Ordinance. The CIR(A), through order dated 22 February 2013, decided the above mentioned appeal by upholding the levy of minimum tax. The Company has filed an appeal with the ATIR in April 2013 which is yet to be fixed for hearing. The rectification application has, however, not yet been taken up for disposal.

33.5 In respect of tax year 2017, audit proceedings under section 177 were initiated against the Company, through order passed by Deputy Commission Inland Revenue (Audit) ['DCIR(A)'] dated 28 July 2018, under section 122(1)/122(5) of the Ordinance. The refund for the aforementioned year was reduced by Rs. 527,393 which majorly pertains to proportion of expenses. The Company appealed against the DCIR(A)'s order before CIR(A) vide application dated 27 May 2020. The CIR(A) vide appellate order dated 30 December 2021 annulled the impugned order with the direction to the Company to provide necessary details/documents. The Company appealed against the order of CIR(A) before ATIR vide application dated 11 March 2022. The proceedings are in progress at this stage.

41 FINANCIAL RISK EXPOSURE AND MANAGEMENT

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including currency risk, interest rate risk and price risk). These risks affect revenues, expenses and assets and liabilities of the Company.

The Board of Directors has the overall responsibility for establishment and oversight of risk management framework. The Board of Directors has developed a risk policy that sets out fundamentals of risk management framework. The risk policy focuses on unpredictability of financial markets, the Company's exposure to risk of adverse effects thereof and objectives, policies and processes for measuring and managing such risks. The management team of the Company is responsible for administering and monitoring the financial and operational financial risk management throughout the Company in accordance with the risk management framework.

The Company's exposure to financial risks, the way these risks affect the financial position and performance, and forecast transactions of the Company and the manner in which such risks are managed is as follows:

41.1 Credit risk

Credit risk is the risk of financial loss to the Company, if the counterparty to a financial instrument fails to meet its obligations.

41.1.1 Credit risk management practices

In order to minimize credit risk, the Company has adopted a policy of only dealing with creditworthy counterparties and limiting significant exposure to any single counterparty. The Company only transacts with counterparties that have reasonably high external credit ratings. Where an external rating is not available, the Company uses an internal credit risk grading mechanism. Particularly for customers, a dedicated team responsible for the determination of credit limits uses a credit scoring system to assess the potential as well as existing customers' credit quality and assigns or updates credit limits accordingly. The ageing profile of trade receivables and individually significant balances, along with collection activities are reviewed on a regular basis. High risk customers are identified and restrictions are placed on future trading, including suspending future shipments and administering dispatches on a prepayment basis or confirmed letters of credit.

The Company reviews the recoverable amount of each financial asset on an individual basis at each reporting date to ensure that adequate loss allowance is made in accordance with the assessment of credit risk for each financial asset.

The Company considers a financial asset to have low credit risk when the asset has reasonably high external credit rating or if an external rating is not available, the asset has an internal rating of 'performing'. Performing means that the counterparty has no past due amounts or otherwise there is no significant increase in credit risk if the amounts are past due in the normal course of business based on history with the counterparty.

In assessing whether the credit risk on a financial asset has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial asset at the reporting date with the risk of a default occurring on the financial asset at the date of initial recognition. In making this assessment, the Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Irrespective of the outcome of the above assessment, the Company presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Company has reasonable and supportable information that demonstrates otherwise. This is usually the case with various customers of the Company where the Company has long standing business relationship with these customers and any amounts that are past due by more than 30 days in the normal course of business are considered 'performing' based on history with the customers. Therefore despite the foregoing, the Company considers some past due trade receivables to have low credit risk where the customer has a good history of meeting its contractual cash flow obligations and is expected to maintain the same in future.

The Company regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk.

The Company considers 'default' to have occurred when the financial asset is credit-impaired. A financial asset is considered to be credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred.

The Company writes off a financial asset when there is information indicating that the counter-party is in severe financial condition and there is no realistic prospect of recovery.

The Company's credit risk grading framework comprises the following categories:

Category	Description	Basis for recognizing ECL
Performing	The counterparty has low credit risk	Trade receivables: Lifetime ECL Other assets: 12-month ECL
Doubtful	Credit risk has increased significantly since initial recognition	Lifetime ECL
In default	There is evidence indicating the assets is credit-impaired	Lifetime ECL
Write-off	There is no realistic prospect of recovery	Amount is written-off

41.1.2 Exposure to credit risk

Credit risk principally arises from debt instruments held by the Company as at the reporting date. The maximum exposure to credit risk as at the reporting date is as follows:

	Note	30-Jun-23 Rupees	30-Jun-22 Rupees
Financial assets at amortized cost			
Long term deposits	20	7,090,700	7,090,700

Bank balances	25	145,321,727	51,265,550
		1,150,072,577	1,122,902,800

41.1.3 Credit quality and impairment

Credit quality of financial assets is assessed by reference to external credit ratings, where available, or to internal credit risk grading. The credit quality of the Company's financial assets exposed to credit risk is as follows:

	Note	External rating	Internal credit risk grading	12-month or life-time ECL	Gross carrying amount Rupees	Loss allowance Rupees
Long term deposits	20	N/A	Performing	12-month ECL	7,090,700	-

Bank balances	25	A1 - A1+	N/A	12-month ECL	145,321,727	-
					1,150,072,577	8,336,018

(a) Long term deposits

Long term deposits comprise security deposits placed with various utility companies and regulatory authorities. These deposits are substantially perpetual in nature. Therefore, no credit risk has been associated with these financial assets and accordingly no loss allowance has been made.

(b) Trade receivables

For trade receivables, the Company has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. The Company determines the expected credit losses on trade receivables by using internal credit risk gradings. As at the reporting date, all trade receivables are considered 'performing' as there is no significant increase in credit risk in respect of these receivables since initial recognition except for trade receivables amounting to Rs. 8,259,221 which are considered doubtful. The ageing analysis of trade receivables as at the reporting date is as follows:

	30-Jun-23 Rupees	30-Jun-22 Rupees
Neither past due nor impaired	560,146,133	444,763,683
Past due by up to 30 days	367,445,649	361,289,252
Past due by 31 days to 180 days	17,756,978	250,144,769
Past due by 181 days or more	8,270,481	8,219,847
	953,619,241	1,064,417,551

(c) Advances to employees

Advances to employees have been given against future salaries and post-employment benefits. Therefore, no credit risk has been associated with these financial assets and accordingly no loss allowance has been made.

(d) Security deposits

These are placed with financial institutions with reasonably high credit ratings and therefore no credit loss is expected. Therefore, no credit risk has been associated with these financial assets and accordingly no loss allowance has been made.

(e) Term deposits and accrued profit thereon

These are placed with financial institutions with reasonably high credit ratings and therefore no credit loss is expected. Therefore, no credit risk has been associated with these financial assets and accordingly no loss allowance has been made.

(f) Bank balances

The bankers of the Company have reasonably high credit ratings as determined by various independent credit rating agencies. Due to long standing business relationships with these counterparties and considering their strong financial standing, management does not expect any credit loss. Therefore, no credit risk has been associated with these financial assets and accordingly no loss allowance has been made.

41.1.4 Concentrations of credit risk

There are no significant concentrations of credit risk, except for trade receivables. The Company's one (30-Jun-22: one) significant customers account for Rs. 140.109 million (30-Jun-22: Rs. Rs. 251.087 million) of trade receivables as at the reporting date, apart from which, exposure to any single customer does not exceed 10% (30-Jun-22: 10%) of trade receivables as at the reporting date. These significant customers have long standing business relationships with the Company and have a good payment record and accordingly non-performance by these customers is not expected.

41.1.5 Collateral held

The Company does not hold any collateral to secure its financial assets with the exception of trade receivables amounting to Rs. 167.671 million (30-Jun-22: Rs. 271.237 million), which are partially secured through letters of credit and advances to employees which are secured against future salaries and post-employment benefits.

41.1.6 Changes in impairment allowance for expected credit losses

The changes in impairment allowance for expected credit losses are as follows:

	<i>Note</i>	30-Jun-23	30-Jun-22

As at end of the year		8,336,018	31,526,148

41.2 Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

41.2.1 Liquidity risk management

The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The Company monitors cash flow requirements and produces cash flow projections for the short and long term. Typically, the Company ensures that it has sufficient cash on demand to meet expected operational cash flows, including servicing of financial obligations. This includes maintenance of balance sheet liquidity ratios, debtors and creditors concentration both in terms of overall funding mix and avoidance of undue reliance on large individual customer. The Company also maintains various lines of credit with banking companies.

41.2.2 Exposure to liquidity risk

The following presents the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The analysis have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay and includes both interest/profit and principal cash flows. To the extent that interest/profit flows are floating rate, the undiscounted amount is derived from interest/profit rate curves at the reporting date.

41.3 Market risk

41.3.1 Currency risk

Currency risk is the risk that fair values or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk arises from transactions and resulting balances that are denominated in a currency other than functional currency.

(a) Currency risk management

The Company manages its exposure to currency risk through continuous monitoring of expected/forecast committed and non-committed foreign currency payments and receipts. Reports on forecast foreign currency transactions, receipts and payments are prepared on monthly basis, exposure to currency risk is measured and appropriate steps are taken to ensure that such exposure is minimized while optimizing return. This includes matching of foreign currency liabilities/payments to assets/receipts and using source inputs in foreign currency.

(b) Exposure to currency risk

The Company's exposure to currency risk as at the reporting date is as follows:

	30-Jun-23	30-Jun-22
	<i>Rupees</i>	<i>Rupees</i>
Financial assets		
Trade receivables		
USD	167,670,956	271,236,813

Net balance sheet exposure	236,680,430	280,404,303

USD	(754,317,731)	(1,045,122,096)
	(813,504,808)	(1,740,735,741)
Net exposure	(576,824,378)	(1,460,331,438)

(c) Exchange rates applied as at the reporting date

The following spot exchange rates were applied as at the reporting date.

	30-Jun-23	30-Jun-22
	<i>Rupees</i>	<i>Rupees</i>
CHF	319.7568	214.3869
JPY	1.9923	1.5046
Euro	312.9308	213.8087
USD	285.9905	204.8467

(d) Sensitivity analysis

A five percent appreciation in Pak Rupee against foreign currencies would have increased profit for the year and equity as at the reporting date by Rs. 11.834 million (30-Jun-22: Rs. 14.02 million). A five percent depreciation in Pak Rupee would have had an equal but opposite effect on profit for the year and equity. The analysis assumes that all other variables, in particular interest rates, remain constant and ignores the impact, if any, on provision for taxation for the year.

41.3.2 Interest/profit rate risk

interest rate risk is the risk that fair values or future cash flows of a financial instrument will fluctuate because of changes in interest rates.

(a) Interest/profit rate risk management

The Company manages interest/profit rate risk by analyzing its interest/profit rate exposure on a dynamic basis. Cash flow interest/profit rate risk is managed by simulating various scenarios taking into consideration refinancing, renewal of existing positions and alternative financing. Based on these scenarios, the Company calculates impact on profit after taxation and equity of defined interest/profit rate shift, mostly 100 basis points.

(b) Interest/profit bearing financial instruments

The effective interest/profit rates for interest/profit bearing financial instruments are mentioned in relevant notes to the financial statements. The Company's interest/profit bearing financial instruments as at the reporting date are as follows:

	30-Jun-23	30-Jun-22
	<i>Rupees</i>	<i>Rupees</i>
Fixed rate instruments		
Financial assets	-	-
Financial liabilities	3,011,426,827	3,200,859,234
Variable rate instruments		
Financial assets	-	-
Financial liabilities	1,756,195,064	647,458,480

(c) Fair value sensitivity analysis for fixed rate instruments

The Company does not account for its fixed rate instruments at fair value

(d) Cash flow sensitivity analysis for variable rate instruments

An increase of 100 basis points in interest/profit rates as at the reporting date would have decreased profit for the year and equity as at the reporting date by Rs. 17.562 million (30-Jun-22: 6.475 million). A decrease of 100 basis points would have had an equal but opposite effect on profit and equity. The analysis assumes that all other variables, in particular foreign exchange rates, remain constant and ignores the impact, if any, on provision for taxation for the year.

41.3.3 Other price risk

Other price risk represents the risk that the fair value or future cash flows of financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or currency risk, whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments. The Company is exposed to price risk in respect of its investments.

(a) Equity price risk management

The Company manages equity price risk by investing a diversified portfolio of securities to reduce the risk of loss from volatility in equity price of an individual security.

(b) Sensitivity analysis

A one percent appreciation in prices of equity securities and mutual fund units as at reporting date would have increased equity as at the reporting date by Rs 1.56 million (30-Jun-22: 6.35 million). A one percent diminution in prices of equity securities and mutual fund units as at the reporting date would have had equal but opposite effect on equity and profit for the year. The analysis assumes that all other variables remain constant and ignores the impact, if any, on provision for taxation for the year.

42 CAPITAL MANAGEMENT

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Board of Directors monitors the return on capital and level of dividends to ordinary shareholders. The Company seeks to keep a balance between the higher return that might be possible with higher level of borrowings and the advantages and security afforded by a sound capital position. The Company monitors capital using the gearing ratio which is debt divided by total capital employed. Debt comprises long term finances including current maturity. Total capital employed includes total equity as shown in the statement of financial position plus debt. The Company's strategy is to maintain an optimal capital structure in order to minimize cost of capital. Gearing ratio of the Company as at the reporting date is as follows:

	<i>Unit</i>	30-Jun-23	30-Jun-22
Total debt	<i>Rupees</i>	4,748,879,327	3,811,167,813
Total equity	<i>Rupees</i>	4,020,587,506	3,738,929,947
Total capital employed		8,769,466,833	7,550,097,760
Gearing	<i>% age</i>	54.15	50.48

There were no changes in the Company's approach to capital management during the year. The Company is not subject to externally imposed capital requirements, except those related to maintenance of debt covenants, commonly imposed by the providers of debt finance.
